1. Ordered List > Blockquote

Inline elements

- *italic* / *italic* , **bold** / **bold**
- [Link text](#) or <http://domain.com> or <http://domain.com>
- `code`
- HTML comment:

Bugs

- `<html>` tags aren't highlighted
- *Spaces between italic words (only with the single asterisk syntax)*
- *Styles that **should overlap** do not*
- (<http://example.net> “with optional title not highlighted”)

```
JavaScript var s = "JavaScript syntax highlighting"; alert(s);
```
